

‘Farm Waste Recycling’

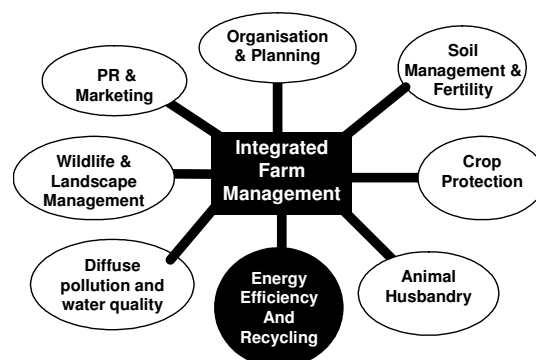

Phil Jarvis, *Allerton Recycling*

Key Principles

Repair- Reuse- Minimise – then Recycle

Key Recommendations

- Clean packaging is a saleable product/ Dirty Packaging is waste.
- Triple rinsed spray cans essential
- Separate waste streams for easier repacking
 - Silage Wrap
 - Net Wrap
 - Fertiliser Bags
 - Feed sacks
 - Spray Cans
 - Cardboard

Economic Benefits

- Recycling Club/Hub is **low cost** when recycled material is clean
- Landfill taxes will increase
- Local – low transport and labour costs
- Duty of Care – Transfer Notes
- Good practice for neighbours and customers

Environmental Benefits

- No dumping or burning
- A single tonne of black plastic has the same energy value as a tonne of diesel. Any further use of such a normally viewed waste product has to be better for the environment
- Aim is to recycle and reprocess locally
- Recycle resources (especially the plastic polymer)
